

## Why Computerize?

### Dependability

The hectic pace of the dispatcher's office makes it easy to *lose* handwritten and verbal customer orders, *forget* quoted prices, or *miss* deliveries to the job. *A computerized system can't forget!!*

All information entered into the system is retained and available for review. Orders are updated automatically as trucks are dispatched and loads are delivered. Future and incomplete orders are retained and automatically activated as scheduled. With a computerized scalehouse your customers will know that the loads they schedule, *will be delivered as promised!!*

### Accuracy

The Visual AC/4 system insures accuracy by producing a mix report, clocking the truck out upon loading, and leaving the dispatcher out of the pricing process.

With VAC/4 the customer gets what they ordered, when they wanted it, at the right price!!

### Increase Volume Not Overhead

It is difficult, if not impossible, to accomplish all of your daily tasks in an accurate and timely manner with a manual system. A computerized system gives you the ability to keep down overhead, provide the dependable service your customers expect, and maintain accurate records. As the business grows, Visual AC/4 absorbs the increased workload with no change to your existing staff.

### Dispatching

- On-line browse and select of customers, jobs, products and charge codes speed order processing and insure accuracy.
- Capture and retain truck tare weight and gross weight
- Recall last truck trip data for rapid processing
- Add customers, jobs and materials "on-the-fly"
- "Break-out" from ticketing functions to schedule orders or log truck activity, and then resume ticketing right where you left off
- Add wait time or miscellaneous charges after truck has left the yard

### Job and Truck Tracking

- On-line inquiry of job deliveries showing quantity scheduled, delivered and remaining to delivered
- Automatic time and destination log at load-out
- Event logging (e.g. arrival at job or breakdown)
- On-line inquiry that displays all trucks and their history for the day

### Pricing and Inventory Control

- Retains quotes for conversion to contract pricing

- Contract and Quote reports
- Flexible product and customer / job specific pricing
- Automatic depletion of raw material inventories with user-defined product mix percentages
- Inventory Status report

### Load Scheduling

- Schedules material delivery for today and future dates
- Automatically updates future scheduled deliveries when due
- Prints daily schedules to plan of truck dispatching

### Management Reporting

- Operations summary report prints one line per day showing totals of all activity
- Audit Exception report highlights operator overrides of automatic weight capture and prices
- Daily Transaction report
- Supports electronic data file transmission for central billing and processing
- Preview all reports on-line, or print

## Why Choose Visual AC/4?

### Customer Billing

- Prints the detailed invoices your customers want
- Flexible pricing based on customer, job and material
- Aged receivable report
- Application of customer payments is quick and accurate

### Hire Truck Payables

- Automatically creates charge entries for hire trucks
- Hire truck payable approval is quick and easy
- Prints checks for hire truck payables
- Hire Truck Ledger report shows charges and payments

### Web Transfers Available

- Pass data from remote plants to your central office via the internet.
- Update material pricing and customer profiles at your plants at the touch of a button

### Ease-of-Use

Visual AC/4 was developed by a firm that has been designing and implementing computer systems for Aggregate, Asphalt, Concrete and Chemical Delivery

operations for over two decades. We listened to our clients and incorporated their needs into Visual AC/4.

A system is of no benefit to you if it is too complicated to master. Visual AC/4 is a menu driven process. Read the screen, select an option and enter information or print tickets, invoices, checks or reports. *It's that simple!!*

### Functionality

Visual AC/4 is designed as a multi-user system which lets one operator accomplish several tasks at once and has the ability for many people to use the system simultaneously. With Visual AC/4's "break-out" feature, you can interrupt ticketing to accomplish other tasks and then resume the ticket processing right where you left off. Dispatching, scheduling loads and tracking trucks all happen simultaneously.

### Try Visual AC/4 FREE!

Go to [www.vac4.com](http://www.vac4.com) to download a fully interactive demo that shows you exactly why Visual AC/4 is the right choice for your bulk delivery needs!

The Visual AC/4 support team is here to get your business up and running with VAC/4, optional LOW monthly payments allow you to get all the benefits of VAC/4 for just dollars a day and be up and running TODAY!

Can your business afford not to try Visual AC/4? Don't let the competition tell you about it.
